

A triple crown for BWT E1 Single Lever filter

The BWT E1 Single Lever filter wins awards in 2014, for excellent design and sustainability.

BWT, Europe's leading water technology company, was honoured with three awards for its BWT E1 Single Lever filter. The LifeCare Initiative presented BWT with the **Home & Trend Award** for 'Innovation of the Year 2014' and the **Best of the Best Golden Award** in the 'Building and Interiors' category.

BWT was also delighted to receive the **EESC European Award 2014** for 'Excellent Design and Sustainability' given by the European Economic and Social Committee (EESC).

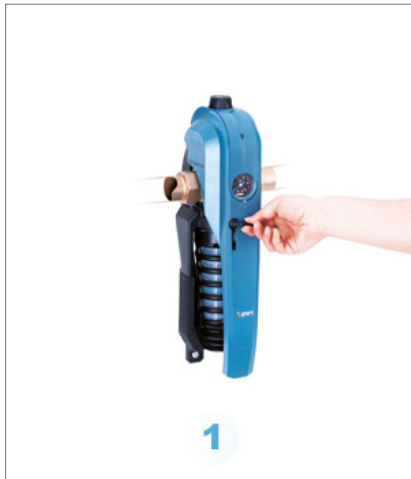

The judges were impressed by the excellent design of the product, which makes tap water much easier to filter. It is user-friendly and gives every household access to a continuous supply of high-quality drinking water, benefiting not only individuals, but society as a whole.

Pure water, in 3 easy steps!

BWT E1 Single Lever is a user-friendly filter that protects domestic installations and appliances from impurities. Although water treatment plants and water supply companies provide clean and safe drinking water, particles such as sand, sealant and metal shavings can find their way into the pipes during repair, renovation or new connection work and then penetrate the domestic system. The BWT E1 Single Lever filter traps these foreign bodies, stopping them from causing dripping taps, clogged drainage sieves or sticky valves. Numerous costly repairs are therefore avoided.

Users can easily replace the filter element in under 30 seconds, without help from a technician. It is so simple:

RELEASE

the locking device, which shuts the water supply off in both directions.

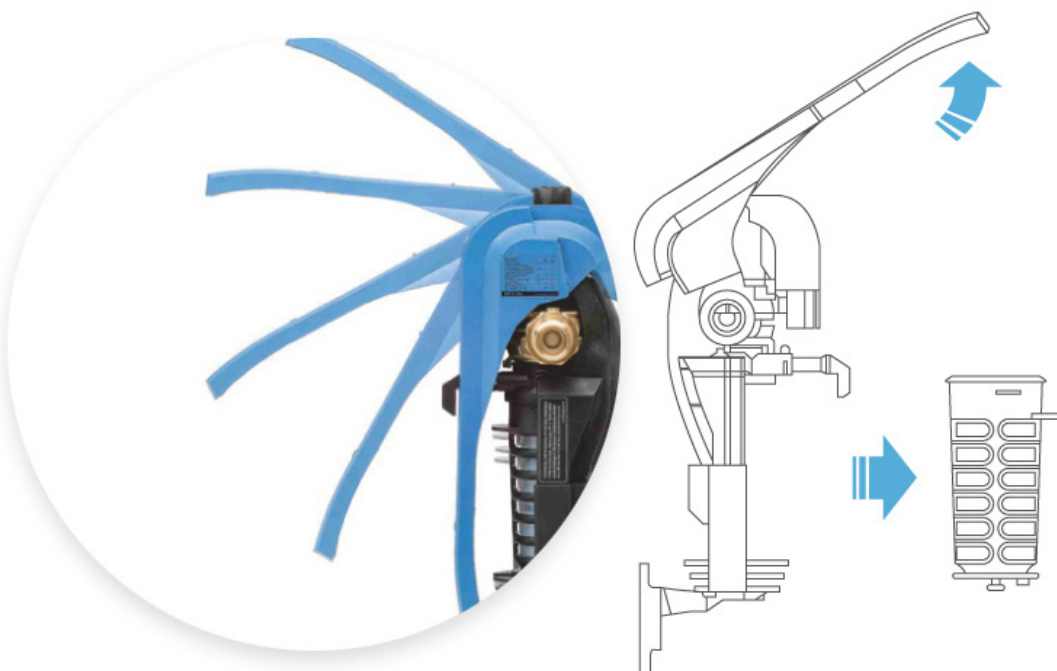

RAISE

the lever to automatically eject the hygiene safe including the filtration element.

INSERT

the new hygiene safe/filtration element, close the lever and lock. Job done!

A cooperation that promotes quality of life

Every year the LifeCare Initiative and the EESC recognize products for their design, innovation, functionality and sustainability. Based on the above criteria, they present excellent products with the Home & Trend Award and the EESC European Award. The organizations promote quality of life and help consumers make choices that will improve their everyday.

10-year warrantee

BWT E1 Single Lever filter is a high-quality product, you can totally trust. The filter is made with durable materials, has an innovative design and international certificates for safety. The purchase of BWT E1 Single Lever filter, is accompanied by a 10-year warrantee (with a service contract).

The Best Water Technology Group (BWT) was formed in 1990 and is now Europe's leading water technology company. BWT's 2,700 employees aim to supply private, industrial, business, hotel and public sector customers with innovative, cost-effective and ecological technologies that guarantee maximum safety, hygiene and health in the daily use of water – the precious elixir of life. BWT provides state-of-the-art water treatment technologies and services for drinking water, pharmaceutical water, process water, heating water, boiler water, cooling water, water for air-conditioning systems and water for swimming pools. Our Research & Development teams, using the latest techniques, work on new processes and materials to create products that are both ecological and economical. A key development issue is a reduction in our products' consumption of operating resources and energy to minimise CO₂ emissions.

BWT E1 Single Lever Product of the Year 2013!

The “Product of the Year 2013” award (Plus X Award, 2013) was given to BWT E1 Single Lever filter for its outstanding performance in four categories.

BWT E1 is the first Single Lever filter in the world that combines so many benefits, concerning its ease of use and hygiene. Innovation, quality design, simplicity and functionality were the features that made this product stand out and win the Plus X Award.

Every year the Plus X Award, the world’s most prestigious innovation award for Technology, Sport and Lifestyle, recognises innovative, quality products that make life easier, are attractively designed and environmentally friendly. BWT E1 Single Lever impressed the judges of the competition as it combines all the above qualities.

The revolutionary filter BWT E1 Single Lever is the first in the world that offers unique advantages in hygiene. The user can easily replace the filter in seconds, without touching it.

BWT E1 Single Lever safeguards domestic installations, appliances and valves from particles at the point of entry to the domestic drinking water system. It prolongs their lifespan and eliminates maintenance costs or damage.

Pure water, in 3 easy steps!

The BWT E1 Single Level filter makes it possible for even non-technical users to have pure, hygienic water in just three quick and easy steps. It takes less than 30 seconds to replace the filter element of the BWT E1 Single Lever filter:

RELEASE

the locking device, which shuts the water supply off in both directions.

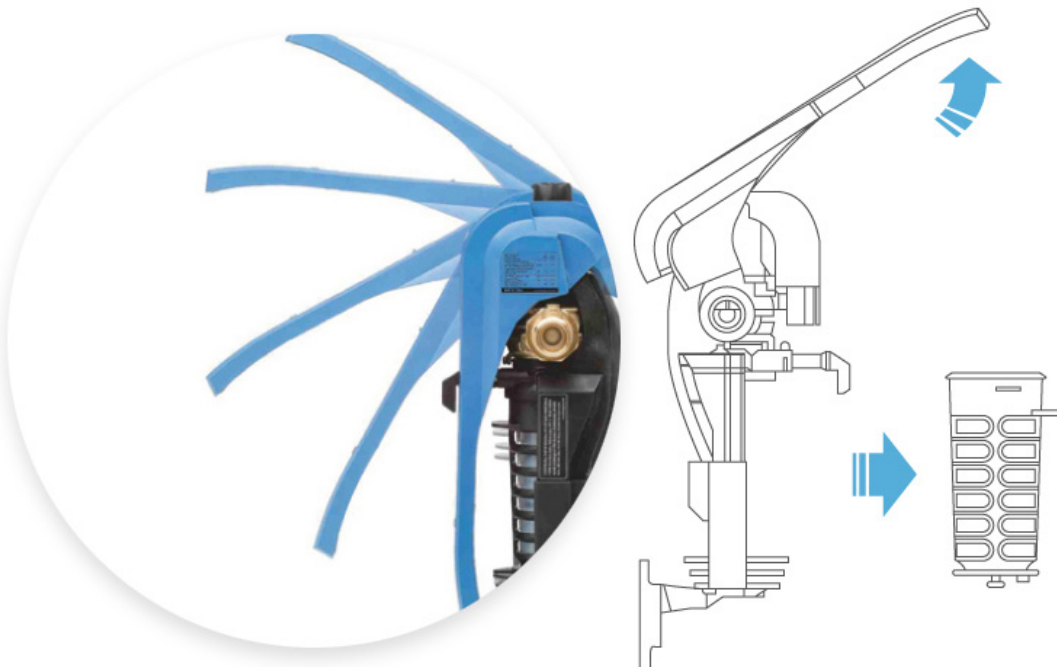

RAISE

the lever to automatically eject the hygiene safe including the filtration element.

INSERT

the new hygiene safe/filtration element, close the lever and lock. Job done!

The development of the BWT E1 Single Lever filter is a milestone in filtration technology. Reducing maintenance costs and setting new safety and hygiene standards, it creates a new filter category. The E1 Single Lever is easier to use than any other available filter.
